

BI Analytics as a Service - Optimize Your Supply Chain Everyday

Most companies think a supply chain and network optimization analysis is an expensive and major project oriented exercise conducted every 3 to 5 years. Market conditions have never changed faster and maintaining a competitive edge has never been more important. Especially for small to mid-sized companies that have to compete against much larger companies with far more resources. Symmedian has recently developed our newest BI (Business Intelligence) Analytics as a Service aimed at helping small to mid-sized companies bring complete clarity and transparency to their data everyday. So what are the advantages?

- **INSTANT IMPLEMENTATION**- (2-3 weeks) you will have online access to tailor made BI tools loaded with your data
- **BOTTOM LINE SAVINGS NOW**- Immediately and visually identify cost savings and
- **DISCOVER** and **SEE** the **ROOT CAUSES**
- **INSTANT BENCHMARKING**- Prove to your logistics service providers (trucks, rail, 3PL's, etc.) that their services are not in line with standard cost norms and **MAKE SURE THEY STAY IN LINE**
- **USE DATA**- Remove opinions and emotions from your decision making process
- **OPTIMIZE YOUR NETWORK** and **SUPPLY CHAIN DAILY**- Not just every 3-5 years
- **VERY LOW COST OF DESIGN AND IMPLEMENTATION**
